

## Environmental Document Library - Organization and Listing of Documents

Documents are organized by category on the bookshelves directly across from the offices of David Bergsten and Charlie Brown (5A59 and 5A60). These shelves are intended to include all EAs and some other related documents. The documents are organized into the following categories with acronyms for each category in parenthesis:

1. Biological Assessment (BA)
2. Economic Assessment (ECA)
3. Environmental Assessment - Animal Damage Control (ADC) and Wildlife Services (WS)
4. Environmental Assessment - Biological Assessment and Taxonomic Support (BATS), PPQ
5. Environmental Assessment - Biotech Permits (BP), BBEP
6. Environmental Assessment - Fruit Fly Programs (FF), PPQ/IS
7. Environmental Assessment - Grasshopper programs (GH), PPQ
8. Environmental Assessment - Gypsy Moth programs (GM), PPQ
9. Environmental Assessment - PPQ, other programs (PPQ)
10. Environmental Assessment - Vet Biologics (VB), BBEP
11. Environmental Assessment - Veterinary Services (VS)
12. Environmental Impact Statement (EIS)
13. Environmental Monitoring Report (EMR)
14. Risk Assessment (RA)

All documents are listed in the tables below in chronological order by category. To locate a document on the shelf, one looks up the document number from the tables below and finds that document in the file folder (or on the shelf for EIS documents). For example, to locate the document with number, BA-5, one takes out the file folder for "Biological Assessments" and thumbs to the 5<sup>th</sup> document to look at that biological assessment. If there is more than one file folder, there will be a notation on the outside of the folder to indicate which documents are within. All documents have document numbers in the upper right hand corner on the front cover page. This wordperfect file has been prepared, so that staff can more readily access completed documents. A quick word search can be made of this file to determine where specific documents have been placed within the library. For example, a word search for the plant "wheat" will lead one to those environmental assessments that analyze actions related to this plant (primarily Biotech Permits EAs).

If you remove a document from the shelves, please sign it out on the "Sign-Out Sheet" located in the "Library File and Sign-Out Sheet" In-Box. After completing your review of the document, please either place the document in the "Library File and Sign-Out Sheet" In-Box or return the document to the exact location in the file folder from where it was retrieved. Please indicate on the "Sign-Out Sheet" that the document was returned. This will assure that the next person seeking that document will be able to easily locate it. The cooperation of all users is needed to ensure that the documents remain easy for all to locate. Any questions or suggestions on how to improve access and make this environmental document library more user-friendly should be directed to David Bergsten.
